## Water Quality and You

It's no secret that water quality is a major driving force in Ohio. Over the past 50 some years since the Cuyahoga River was on fire, residents of this state have worked to clean up our waterways. Over the past decade, we have noticed more issues with algae and nutrient load in our lakes, streams, and rivers. In response, Ohio has put some very large programs in place, such as H2Ohio and a new Regional Watershed Program.

Join us for coffee and donuts as Joshua Emanuelson, Regional Watershed Manager for Ohio Department of Agriculture, Division of Soil and Water Conservation discusses H2Ohio successes, the regional watershed program's role, and what to expect for Northeast Ohio. This is a free event, but registration is requested.

**When:** March 7<sup>th</sup>, 2023

9:00 am – 10:00 am

**Where:** Trumbull County Agricultural & Family Education Center

520 W. Main St. Cortland, OH 44410
